If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 3-9, 12, 16-18, 22-28, 30-45, 48 are allowed and are renumbered 1-36 and 2 respectively.
2. The following is an examiner's statement of reasons for allowance: Claims 1, 3-9, 12, 16-18, 22-28, 30-45, 48 recite specific features in which the prior art of record neither anticipates nor renders obviousness. The closest prior art relevant to applicant's claimed invention is Littleton et al. (US 20030023759) which discloses a system to synchronize data between a handheld computer and a database including an address book (Paragraphs 6 and 14).
3. Regarding Claims 1, 9, 12, 16, 17, 18, 23, 32, and 39, Littleton et al. discloses a synchronization system including memory (medium) storing computer program code (instructions), a processor executing the code (Claim 18) to create a session to synchronize two devices (Paragraph 16), the system comprising two communication devices (PDA and PC) and where the first communication device (PDA) comprises a user data unit (contact information record including phone numbers and addresses, Paragraph 15), defining in the synchronization system through a database, binding data (contact record and service features, Paragraph 15 and 22) which associates a user data identifier (phone number, Paragraph 22) identifying the user data unit with an identifier for identifying (speed dial is an identifier, Paragraph 22) at least one function of

Art Unit: 2617

the first synchronization device (speed dial is a function of the device, Paragraph 22), the second communication device is a synchronization server (PC includes synchronization manager and PIM conduit, Paragraph 16), performing synchronization steps between the first communication device and the second communication device, the step comprising transferring the user data unit and the binding data from the first communications device to the second communications device (service features and phone numbers are compressed and sent to PC, Paragraphs 23 and 25).

4. However Littleton et al. fails to disclose or render obvious in response to the performance of the first synchronization step performing a second synchronization step with the second communications device, the step comprising transferring the binding data from the first synchronization device to the second synchronization device, wherein the second communications device is a synchronization server configured to synchronize the binding data to a mobile communications device to form binding in the mobile communications device in accordance with the binding data, and the first communication device checks whether the second communications device supports binding data synchronization, transmit the binding data to the second communications device in the second synchronization step in response to the fact that the second communications device supports binding data synchronization on the basis of the check, in response to a user data unit defined in the synchronized binding data not being available in the mobile device, the mobile device is configured to request the user data unit from the second device, and the mobile device form a binding between the

Art Unit: 2617

further data unit, received in response to the request and at least one of its functions in accordance with the binding data.

5. Regarding Claims 3-8, 22, 24-28, 30-31, 33-38, 40-45, and 48 are allowed for being dependent on an allowed base claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
